Rule of Hungary Slipshod, Dutch Researcher Observes

"Siesas" is the byword now in Russian-ruled Budapest, Hungary. According to Dr. A. N. J. den Hollander, Dutch scholar, "siesas" is the Hungarian version of the Spanish "manana," when that word is used to denote postponement or procrastination.

Dr. den Hollander, who spent some time in the Hungarian capital as a researcher and lectured in sociology for Northwestern university (Chicago) says:

"In spite of their fascination at anything mechanical, the Russians cannot run anything efficiently. For all their love of watches, they cannot do anything on time. There is a word on everyone's tongue now in Budapest—"siesas." "Tomorrow maybe," is an equivalent American translation. Ask a request of a Russian and he says only "siesas," whether he's on duty or not.

"The Hungarians have always been by American standards, pessimisters. Now they are amused that their Russian masters are worse than Hungarians at letting things go, putting off, and being generally irresponsible.

"In the Russian-dominated city many spots are feverishly gay. Anyone with sufficient money can buy anything he wants, including American cigarettes, nylons, coffee and tea. Amusements are wide open. The Russians, particularly, flock to the opera.

"Real estate prices in the city are low, and buying and building are stagnant. Who wants to buy a house or build one, when Communist redistribution may take it away."

Pottery, Old as the Hills, Becomes Thriving Industry

First simple handmade pottery was hardened by drying in the sun. Fingers shaped the vessels of clay. Different districts provided different colors of clay, and so color decoration was discovered. This is the basis on which all pottery of the previous 4,000 years was built—the primitive foundation on which all Egyptian, Chinese and Greek pottery was developed.

It was ancient man who invented the potter's wheel. The Egyptians developed pottery of glowing color. The Chinese, out of their glazed, hard-fired pottery, gave the world the white translucent porcelain that became the wonder of the medieval world.

Pottery-making was a family art, a secret, handed down from father to son, for many generations, according to National Patent council. The practice continued even after the founding of the American colonies, but in the American Constitution there was written a provision for protection of invention without secrecy.

Today the best in United States pottery and porcelain is as good as any made elsewhere in the world.

Britain Mobilizes Ants

Britain is even mobilizing ants in the struggle to earn more dollars. If plans drawn up by 64-year-old Mrs. Robert Briant and her son are successful, Amber Meadow ants will earn something like $100,000 a year. It is claimed that only Mrs. Briant knows the secret of making ant palaces—miniature glass-topped cubicles each containing 1,000 ants busy organizing their own social life. Her late husband, a entymologist, perfected a special process for transferring ants to an artificial environment. After his death 20 years ago, Mrs. Briant continued the work on the project. The United States is the only climate where the ants will live in their artificial home and the Amber Meadow ants are the only variety which can be transferred successfully from their ant heaps to wooden boxes.

Interesting State Names

Many state names, besides those derived from European monarchs and locations, have colorful meanings and come from the French, Spanish and Indian languages. Vermont, from the French, means "Green Mountain," while Florida comes from the Spanish Pascua Florida, or "Palm Sunday." Montana, from the classical Latin, means "mountainous." Minnesota, Idaho and Utah are names derived from Indian tongues. Minnesota, from the Sioux, means "cloudy" or "sky-colored water," Idaho (said to be named from the Shoshonean) "gem of the mountains," or "it is sunrise," while Utah is named for the Ute Indians.

Milk, Good Food 'Buy'

A quart of milk—four glasses—supplies approximately these percentages of the daily nutritive requirements of an average man: Calcium, 100 per cent; riboflavin (vitamin G), 82 per cent; phosphorus, 67 per cent; protein, 49 per cent; vitamin A, 30 per cent; thiamin (vitamin B-1), 22 per cent; calories, 22 per cent; vitamin C, 19 per cent; niacin, 6 per cent; iron, 3 per cent. There is no waste in milk, as every drop is used. A quart of milk is equal in energy value to approximately any one of the following: One pound lean beaf, nine eggs, six pounds tomatoes, six pounds spinach, 13 small oranges, three broilers, seven bananas or five pounds raw cabbage.

announce The Price Of Tobacco Seed

DISEASE RESISTANT TOBACCO SEED

To the interest of all flue-cured tobacco growers is the development of VESTA lines of tobacco seed, which is resistant to disease. In recent years, blackshank, a terrible disease, has appeared in Appomattox County and growers in this area are advised by R.E. Hudgins, County Agent, to secure the seed of the strain of VESTA they prefer.

Dr. W. A. Jenkins of the Chatham Experiment Station advises that his supply of VESTA tobacco seed is very short. Early orders will have a much better evance of being filled.

Growers may obtain seed of the VESTA lines from Dr. W. A. Jenkins of Chatham Experiment Station at $2.00 per ounce. Cash must accompany the order or seed will be sent C. O. D.

Extension Ser. Plans Program Older Youth

OLDER RURAL YOUTH TO RECEIVE ATTENTION IN EXTENSION PROGRAM

A long-time, statewide program to improve the lot of older rural youth has been announced by W. W. Eure, rural youth specialist at V. P. I.

Eure explained that studies are being made in various Virginia counties now to determine the needs of older youth and to develop programs. He defined older rural youth as those belonging "generally to the group between 18 and 26 years of age." This period, he said, is that between 4-H Clug age and adulthood, and has been neglected in organized programs.

The state youth committee has set forth the following objectives:

To help youth develop wholesome democratic attitudes, and to help them acquire skills in farming, homemaking, and other vocations.

To emphasize the importance of youth participation in adult community activities.

To get the help of and cooperate with other youth-serving agencies.

To encourage all Extension Service personnel to serve this group.

To promote an active program of training, and to develop leadership in county, state, national and international affairs.

Stressing the need for the youth program, Eure said that the 1940 census showed that more than 250,000 youths between the ages of 18 and 26 live in Virginia; and that 57 per cent of the white farm boys and 44 per cent of the white farm girls, who were 21 when the census was taken, had stopped school at the seventh grade or below.

Tuesday, November 2nd, is election day.

Uncle Sam Says

Farming is a combination of a business and a home. And you farmers realize that a well-managed business must maintain a financial reserve as security against future needs and emergencies. This reserve is built up during the good years, like this one, when many crops are the biggest in history. It must be in the safest possible form and always available. Nothing meets these requirements so well as U. S. Savings Bonds. You know that Savings Bonds provide more security than cash because they will be replaced if lost or stolen and they also bear interest, paying $4 for every $3 invested, in ten years.

Stonewall

Stonewall, Oct. 25.- We had such a big frost last week it looked as it had snowed. All the things not in were ruined.

There was no preaching at Bethel Church last Sunday, because the pastor, the Rev. D. M. Spence, is sick. We hope for him a speedy recovery.

Mrs. P. B. Stratton and Miss Edna Adcock visited Mr. and Mrs. E. L. Chick last Saturday.

The Rev G. E. Hughes will preach at Bethel Church next Sunday at 11 A. M. Everybody welcome.

Mr. and Mrs. Joe Burnette and children and Aubrey Lee Burnette, of Roanoke spent the week-end with Mr. and Mrs. J. Rufus Burnette.

J. H. Board and son, George, and Mr. and Mrs. E. L. Click spent last Sunday with Mr. and Mrs. Henry Bet d at Appomattox, to celebrate Mr. Board's birthday. We wish him many more happy returns of the day.

Mr. and Mrs. Wash Wheeler, of Rustburg, visited their daughter, Mrs. Tilton Lee and her family last week.

Mr. and Mrs. Irby Wheeler and Mrs. Lee Wheeler were called to Roanoke last week on account of Mrs. Rova Carson being ill. She is an aunt of Mr. and Mrs. Wheeler.

Mrs. A F. Drinkard is spending this week with Mr. and Mrs. Hewlette Drinkard.

Appomattox is a growing town.

Sunday Motoring in Holland

Gasless cars called "Fietstaxis" have made their debut in Holland. If one doesn't mind pedaling, everything is all right. The cars are made of lightweight metal with one control for steering and a set of double pedals for pedaling. Car can carry two in front with a rumble seat for a third passenger. Wheels are bicycle type. The cars can be rented by the hour or day. It's a break for the Dutch, who are forbidden by law to use their autos on Sunday in order to save gas.

Back Fullness

Reminiscent of the quaint prettiness of the nineties is this date dress in taffeta, by Quilla Darby of St. Louis, for those who wear junior sizes. Interesting detail is seen in the overskirt draped to cascading fullness in the back.

...coats scaled to the figure do more for the petite person.

Choose Fur Coats For Proportion

The choice of a fur coat for the small and slight person usually offers more of a problem than for one of taller stature. The tall figure can show furs off naturally to more advantage and the choice of fur is not so limited, but short women can look chic also.

Overpowering furs are to be avoided completely unless you want to look like an overgrown bear cub. Choose the small fur with slightly accented shoulders, careful length, and little fullness. The slim, princess silhouette in a flat fur is perfect for petite figures.

The demi-coat, about 32 inches in length, in a flat fur such as Persian lamb, mouton lamb or muskrat are good choices for the smaller figure currently. Be sure the shoulders are slight, and do not have too much fullness in the coat generally.

If you're choosing a fur jacket, don't choose a longer cape or wrist-length type. The above-the-waist cape or capelet are much better.

Choose Light Feeling Suits for Short Figures

Large plaids made of heavy fabrics are not for small people since they take large frames to carry them around. Your suit may be softly tailored or even man-tailored,

Or make yourself look taller.

but it should be in good proportion to your figure.

Soft monotone woolens or small patterned light-weight tweeds may be worn by small people.

Roxy, double breasted jackets will cut the small figure too much so it's wise to choose those suits which give long lines.

Select a suit that is best kept closed so that it will give a unity of impression and thus add height. You may have a small, frilly collar on the blouse, but it's really better not to show more than that, as contrasty blouses and suits destroy unity.

If you're petite, another thing to do is to avoid equal length in the skirt and jacket. Emphasize the girlishness of the figure by having a short jacket.

When you do have a color break in your suit, keep it high, rather than bringing it down even as far as the waist. Match hat and shoes so they can make you look taller.

High heels and high hats do not make the short woman look taller. They give just the opposite impression because they are in such contrast to the figure itself. You may wear a high but not a towering hat, and medium heels.

Hixburg

Hixburg, Oct. 19.- Dr. Twyman Williams preached a fine sermon at Hitburg Presbyterian Church Sunday night. A number of people from out of the community attended this service. Dr. Williams' daughter -in- law from Lexington, was with him. His next service in this church will be the first Sunday in November.

Mrs. C. B. Carson was the dinner guest of her parents at Walnut Shade. Mrs. Carson, with Mr. and Mrs. J. R. Marshall and Mrs. B. G Grinstead called in the home of Mrs George Singleton, at Darling-ton Heights Sunday P. M. They also called by the home of Thornton Cunningham. Miss Arvis Cunningham returned with Mrs. Carson, en-route to Richmond, where she is nursing.

Mr. and Mrs. Nelson Hix and daughter were dinner guests of her parents, Mr. and Mrs. E. H. Carson at "Scotland." Mr. and Mrs. C B. Carson and John spent Saturday night there.
